

Wydział Inżynierii Materiałowej i Ceramiki
Katedra Technologii Materiałów Budowlanych

zaprasza na:

SEMINARIUM

„Modern cements and their characterization methods”

Program:

11:15 Presentations and discussion (session 1)

- Introduction to the seminar by Prof. Jan Deja (WIMiC/AGH)
- Industrial view on alternative binders – Dr. Mohsen Ben Haha (Global R&D Heidelberg Cement)
- Application of solid state NMR spectroscopy in the development of sustainable Portland cement blends – Prof. Jørgen Skibsted (Department of Chemistry, University Aarhus)

13:00 Coffee break

13:30 Presentations and discussion (session 2)

- Microstructure characterization of cementitious materials – Dr. Mohsen Ben Haha (Global R&D Heidelberg Cement)
- Application of modelling; from chemistry to mechanical performance – Dr. Maciej Zając (Global R&D Heidelberg Cement)

29.10.2018 r.
(poniedziałek)

sala 0.18,
budynek B-8 AGH
(sala Rady Wydziału)
